SUMMARY

Senior software engineer with 6+ years building scalable, high-performance web and mobile products across React, Next.js, Vue and Node/TypeScript. Comfortable end-to-end — from UI craft to APIs, AWS infrastructure and CI/CD — with a bias for code quality, reliability and long-term maintainability. I also design and ship small independent products, which keeps my eye on UX and the real cost of every decision.

EXPERIENCE

Senior Software Engineer, [Escale Digital](#)

São Paulo, Brazil · Mar 2025 – Present

- Build full-stack solutions across Vue.js, Next.js, Node.js and Ruby for customer-service and intelligent-automation platforms.
- Refactor application logic and SQL queries to cut resource usage and response times; proactively resolve production bottlenecks.
- Design and operate AWS infrastructure (Lambda, ECS, S3, CloudWatch) and CI/CD pipelines, improving deployment reliability and speed.

Software Engineer, [Codebrew Labs](#)

Remote · Mar 2023 – Mar 2025

- Built and maintained full-stack web and mobile applications with React, React Native and TypeScript.
- Shipped a React Native mobile app from scratch with a focus on stability and maintainability.
- Introduced unit-testing practices that improved reliability and shortened bug-resolution time.

Frontend Developer, [C6 Bank](#)

Remote · Dec 2021 – Feb 2023

- Built core features of a payroll MVP for the PJ (business) segment with React and Redux.
- Delivered the MVP in under three months with ~95% unit-test coverage; built reusable UI components and improved state management.

Earlier — Frontend Developer

- Deliver IT** (2021) — multilingual support (PT/EN/ES) with Next.js and i18n; improved onboarding and accessibility.
- Sabion Digital** (2020–2021) — helped architect and ship the Guarupass MVP, upholding code quality through reviews.
- Entenda Antes — O Mundo da Construção** (2019–2020) — Angular features and UX improvements that lifted user retention ~15%.
